

# FUJI ELECTRIC REVIEW vol.68 no.2 2022 Detailed Contents

<b>Preface</b>	61
<b>Contributing to the Creation of New Social Value Through Our Energy and Environment Businesses</b>	
<b>Creating New Customer Value and Resolving Social Issues Through Our Innovation in Energy and Environment Technology</b>	62
<b>Highlights</b>	64
<ul style="list-style-type: none"> <li>○ Delivery of Rectifier Equipment for Train-6 Chlor-Alkali Electrolysis Plant of AGC Inc.</li> <li>○ “PVI1400CJ-3/2600” PCS for Large Capacity Storage Batteries for the Real Time Market</li> <li>○ Industry’s Smallest Class Switchgear That Complies with IEC Standard</li> <li>○ “SPH5000EC” CPU Module of “MICREX-SX Series”</li> <li>○ “FCX-AIV Series” Pressure Transmitters</li> <li>○ CEMS for a Shin-Sapporo Station Area Development Project by Hokkaido Gas Co., Ltd.</li> <li>○ Remote Witness Inspections via LTE Wireless Communications</li> <li>○ External Operating Handles and Terminal Covers with Improved Electrical Safety</li> <li>○ “M677” 100-kW Class Ultra-Compact RC-IGBT Module for xEVs</li> <li>○ 3.3-kV All-SiC Modules integrated with the 2nd-Generation Trench Gate SiC MOSFETs</li> <li>○ Commencement of Commercial Operation of Rantau Dedap Geothermal Power Plant in Indonesia</li> <li>○ “Frozen Station” Frozen Food Vending Machine</li> <li>○ Model Reduction Technique Using Machine Learning Models with Thermo-Fluid Analysis Results</li> <li>○ Analysis of Abnormality Causes with Cause and Effect Analysis and Machine Learning</li> <li>○ Electrical Contact Technology for GIS with a SF6 Alternative Gas</li> <li>○ Compressor-Less Highly Efficiency Cooling Technology</li> </ul>	
<b>Power Electronics Energy</b>	72
<b>Energy Management</b>	73
<ul style="list-style-type: none"> <li>① Operation Support System for Power Distribution System Planning</li> <li>② Delivery of Test Equipment for Power System Reduced Models</li> </ul>	
<b>Transmission and Distribution Systems</b>	74
<ul style="list-style-type: none"> <li>① Commercial Operation Started at Fukushima Iwaki Biomass Power Plant</li> <li>② 275-kV, 450-MVA Transformers for Shin-Kisarazu Substation, TEPCO Power Grid, Incorporated</li> <li>③ Replacing a Transformer Rectifier for DC Furnace for Tokyo Steel Manufacturing Co., Ltd.</li> <li>④ Operational Notice Transmission System for Local Railways of Kyushu Railway Company</li> </ul>	
<b>Power Supply and Facility Systems</b>	75
<ul style="list-style-type: none"> <li>① Delivery of a UPS System to a Computer Center</li> <li>② Delivery of a Large Capacity UPS System (1,200 kVA)</li> <li>③ IEC-Compliant Power Distribution Unit (PDU) for IDC Servers, Marketed in Japan</li> </ul>	
<b>Electric Distribution, Switching and Control Devices</b>	76
<ul style="list-style-type: none"> <li>① “HS2006X Series” Vacuum Circuit Breakers with Reduced Life Cycle Cost</li> </ul>	

<b>Power Electronics Industry</b>	77
<b>Factory Automation</b>	78
<ul style="list-style-type: none"> <li>① Zero-Phase Reactor Built-In Type of “FRENIC-MEGA (G2) Series”</li> <li>② Ethernet Communication Card for the “FRENIC-MEGA (G2) Series” Low-Voltage Inverters</li> <li>③ “FRENIC-RHC (RHC-E) Series” PWM Converters</li> <li>④ JFII Series Breaker-Shaped Watt-Hour Meter with Communication Function</li> <li>⑤ “Abnormality Diagnosis Solution” Powered by Analytics and AI (MSPC)</li> <li>⑥ Test Equipment for EVs</li> </ul>	
<b>Process Automation</b>	80
<ul style="list-style-type: none"> <li>① Enhancement of Functionality of “f(s)NISDAS7” Supporting Package Software for Data Acquisition and Analysis</li> <li>② Replacement of Existing I/O Using the “FTITM” Conventionally Compatible Interface Terminal</li> <li>③ Delivery of Drive Control System for Film Manufacturing Facility</li> <li>④ “FRENIC4600FM6e” Medium-Voltage Inverter Increased in Reliability</li> <li>⑤ Delivery of Electrical and Instrumentation Equipment for Eco Cleanpeer Harima</li> <li>⑥ Monitoring and Control System for Off-Site Facilities of an Oil Refinery</li> <li>⑦ Replacement of Monitoring and Control System for Water Facilities at a Steelworks</li> <li>⑧ Remote Maintenance System for Industrial Monitoring and Control Systems</li> <li>⑨ Replacement of the Monitoring and Control System at a Chemical Plant</li> <li>⑩ “HEART” Highly Efficiency Engineering Support Tool Automatically Visualizing Changes in Specifications and Diagrams</li> <li>⑪ Maintenance System for Induction Furnace Operation</li> </ul>	
<b>Information Solutions</b>	84
<ul style="list-style-type: none"> <li>① Location Information Provision Software Using LPWA Devices</li> </ul>	
<b>Social Solutions</b>	84
<ul style="list-style-type: none"> <li>① Door Drive System for Series 315 Conventional Line Commuter Train (Central Japan Railway Company)</li> <li>② Exhaust Gas Cleaning System for Navigation in No-Discharge Zones</li> <li>③ Capacity Expansion of the SOx Scrubber for Marine Vessels</li> <li>④ New Monitoring Post</li> </ul>	
<b>Field Services</b>	86
<ul style="list-style-type: none"> <li>① “Comprehensive Service for Smart Industrial Safety” Additional Functions</li> <li>② “Fuji Wearable Remote Operation Support Package (FWOSP-Glass)” Additional Functions</li> </ul>	
<b>Semiconductors</b>	87
<b>Industrial</b>	88
<ul style="list-style-type: none"> <li>① Line-Up of the “P633C Series” 3rd-Generation Small IPMs</li> <li>② Line-Up of the “P631” 7th-Generation High-Power IGBT-IPM</li> <li>③ Line-Up of the “X Series” 7th-Generation High-Power IGBT Modules</li> </ul>	

# FUJI ELECTRIC REVIEW vol.68 no.2 2022 Detailed Contents

④ “FA8C00 Series” 7th-Generation PWM Power Supply Control ICs	
⑤ 3.3-kV 2nd-Generation SiC Trench Gate MOSFETs	
⑥ Digital Output Temperature Sensor IC Technology	
⑦ Capacitance Analysis Technology to Reduce IGBT Turn-On Loss	
<b>Automotive</b>	90
① Line-Up of the “Super J MOS S2FDA Series” 2nd-Generation Automotive SJ-MOSFET	
② Ultra-Compact RC-IGBT Module Coolers for xEVs	
<b>Power Generation</b>	91
<b>Renewable Energy and New Energy</b>	92
① Start of the Commercial Operation of the Kanda Biomass Power Plant, Kanda Biomass Energy K.K.	
② Solar Power Station with Storage Batteries for Regional Microgrid	
<b>Solution Services</b>	93
① Efforts to Recycle Waste Cables Generated in the Decommissioning of Nuclear Power Plants	
② Decontamination System for Small Diameter Tubes	
<b>Food Distribution</b>	94
<b>Vending Machines</b>	95
① Recoinage Support for Automatic Change Dispensers	
<b>Store Distribution</b>	95
① Showcase Control Technology for Energy Saving	

<b>Fundamental and Advanced Technologies</b>	96
<b>Fundamental Technology</b>	97
① Performance Improvement of Image Recognition AI with Recognition Area Correction Technology	
② Control Constant Optimization Technology for Voltage Regulator	
③ OSS Firmware Quality Assurance Technology	
④ Log Management Technology for Cloud Systems	
⑤ Alkaline Cleaning Technology with Water Electrolysis by Magnesium	
⑥ High Thrust Density Linear Motor Not Using Rare Earth	
⑦ High Temperature, High Wind Electrostatic Precipitator Technology for Marine Engines	
⑧ Establishing Coating Film Evaluation Technology	
<b>Advanced Technology</b>	100
① Low Concentration Gas Measurement Technology by Ultraviolet Absorption Spectroscopy	
② Noise Canceler Technology for Power Factor Correction Circuit	
③ Airborne Virus Inactivation Technology	
④ 1D Simulation for Freezing and Heating Technology Development of Vending Machines
